

Bodymed AG acquired by Nestlé Health Science

October 2020

GHZ Partners advises shareholders of Bodymed AG on its divestiture to Nestlé Health Science

GHZ Partners is pleased to announce that it acted as the exclusive financial advisor to the shareholders of Bodymed AG, a technology company offering specialized programs for sustainable weight loss for overweight patients, on its divestiture to Nestlé Health Science in Germany, as a part of Nestlé Deutschland AG.

The software supported Bodymed concept includes medical care in 1,350 Bodymed centers in Germany, Austria, and Switzerland. Since the company was founded 25 years ago, the range and the support offered have established themselves primarily in the German and Austrian markets.

"We can't think of a better partner for Bodymed than Nestlé Health Science," added Dr. med. Hardy Walle, CEO and founder of Bodymed. "Our expertise and product range for those who are moderately and heavily overweight who want to lose weight can thus be expanded and reach even more people. The existing and new partners - doctors, operators of Bodymed centers, nutritionists, clinics - and, of course, above all the patients, will gain from a joint, complementary offer from both companies."

"Dr. Plagge from GHZ Partners provided excellent advice and support from the initial business contact, during negotiations up to the successful sale of my company. His level-headed yet very professional approach, coupled with a special negotiating skill, was very productive and, in the end, correspondingly successful. I can unreservedly recommend Dr. Plagge and GHZ Partners." said Dr. Hardy Walle, founder & CEO of Bodymed AG.

The terms of the transaction were not disclosed.
